QUAD REPORT · MEMBER GUIDE · V1.0

Set it up once. Run it monthly. Stay current.

Your Vistage one-pager, built from your own books. Quadrants i, ii and iii come from your numbers. Quadrant iv is yours to write.

UPDATES NEVER TOUCH IT

Your Quad Report Data folder

Unzip it into your OneDrive, Google Drive or SharePoint. Every tool below reads it. Switch tools and you keep every month.

`quad-profile.json` `history/2026-09.json` `out/2026-09.pptx`

	ChatGPT FULL BUILD · EASIEST	Claude desktop FULL BUILD	Claude on the web FULL BUILD	Copilot NUMBERS ONLY
SET UP once, then the 30 min interview	1. Sign in to ChatGPT. 2. Open the Quad Report GPT link from your welcome email. 3. Say **set up my quad report**	1. Open **Customize**, then **Plugins**. 2. Click **Add marketplace** and paste `jessica-btcs/quad-report` 3. Install **quad-report**. 4. Turn on **Sync automatically**. 5. Connect your data folder, then say **set up my quad report** Everyone uses this same address. No GitHub account or copy of your own.	1. In **Settings > Capabilities**, turn on **Code execution**. 2. Download the skill zip from your welcome email. 3. Open **Customize > Skills**, click **+**, then **Upload a skill**. 4. Say **set up my quad report**	1. Download the Copilot pack from your welcome email. 2. Create a Copilot agent. 3. Paste in the pack's instructions and add its files. 4. Say **set up my quad report**
EVERY MONTH before your meeting	**build my quad for September** 1. Attach your profile and last month's history file. 2. Save what it hands back into your folder.	**build my quad for September** 1. That's it. It reads and writes your folder directly.	**build my quad for September** 1. Attach your profile and last month's history file. 2. Save what it hands back into your folder.	1. Attach your profile and last month's history file. 2. Type its numbers into the blank slide template. 3. Save the history file it hands back.
UPDATES new version out	**Automatic** Every new chat runs the latest version.	**Automatic** Once Sync automatically is on. It also tells you when a new version is out.	**Swap the zip** Upload the new zip from the update email in place of the old one.	**Swap the pack** Replace the agent's files with the new pack from the update email.

WHAT HAPPENS EACH MONTH

Gathers — Revenue, delivery cost, overhead and cash from your accounts or uploads.

▶

Reconciles — Checks your time records against your books first.

▶

Builds — Quadrants i to iii, with trends and STUCK goals from your history.

▶

You finish — Write quadrant iv and take it to the meeting.

How far your time records and your books can disagree before it stops trusting the margin:

Builds it — Gap printed on the hand-off.

Builds it, flags it — Names the likely cause, usually a missing cost rate.

Holds back margin — Tells you what to fix instead of guessing.

YOUR FIRST RUN: HAVE THESE NEARBY

20–40 MINUTES · SAVES AS IT GOES

- [ ] **P&L by month, last 12 months, accrual basis**
  Or connect your accounting system. A column per month.
- [ ] **Balance sheet as of last month end**
  For your cash reserve.
- [ ] **Your time or job costing system**
  Hours by person, by job, with a cost rate: Harvest, BigTime, Procore, ServiceTitan, QuickBooks Time. Optional; it makes margin real.
- [ ] **Your annual planning deck**
  So your goals go in word for word.

Expect a finding. The usual one: salaried delivery time in operating expenses, which flatters gross margin.

Your numbers stay yours. They live in your own accounts and your own folder. Nobody who shared this with you can see them.
